- Calibration Laboratory conforms/adheres to ISO17025 requirements

BENEFITS

- Reduce Calibration Costs
- Four-week advance notice of calibration expiration
- Purchase 2 cycles – 3rd is free
- Improve up-time
- Ensure compliance to metrology requirements
- Fast Turnaround

Flow Calibration Plan

DESCRIPTION

Hastings Instruments offers its flow calibration services featuring deeply discounted pricing. The plan allows the user to integrate high-quality calibrations into metrology schedules for Hastings' 200 Series & 300 Series analog and digital flow meters and controllers.

The plan may be purchased for either new or recently reconditioned instruments.

Each instrument under the plan is eligible for three calibrations anytime within a 36-month period. Under the discount service plan, the user purchases two calibrations and receives a third at no cost. At the time of purchase, the user may specify a calibration interval; Hastings Service will track the unit's history and provide advance notice (four weeks) of the next scheduled calibration.
